

# Generate Awareness and Leads With SD Times E-Newsletter Sponsorships!

SD Times publishes hot news and analysis each week in a timely HTML e-newsletter. Published every Monday, distribution is to more than 110,000 SD Times subscribers and other opt-in readers.

## IN THE NEWS

### Deep linking: The foundation for a new mobile Web

By Rob Marvin

A mobile user clicks a link in a smartphone app. Another app automatically opens inside the first to the exact page the user was looking for. When that happens, the user doesn't question how she or he got there. It just works. Behind those responsive intra-app connections are app connections didn't truly take off until this year, when Facebook, Google and Twitter each publicly unveiled their own mobile deep-linking efforts. Facebook announced App Links at its startup TapCommerce. Apple's Extensions... [READ MORE](#)

### jQuery 3.0 and the future of Web development

By Rob Marvin

The next step for the open-source platform is jQuery 3.0. In a recent blog post entitled "jQuery 3.0: The Next Generations", jQuery development team core lead and jQuery Foundation president Dave Methvin previewed what developers can expect going forward in jQuery's next release. SD Times spoke with Methvin... [READ MORE](#)

- \* highlights hits in all of the above
- \* APIs for .NET, Java, C++, SQL, etc.
- \* SDKs: Win-Linux-Android (beta).

Please see [www.dtsearch.com](#) for hundreds of reviews and developer case studies, and to download fully-functional evaluations.

## ZEICHICK'S TAKE

### Capriza's clever mobility via HTML screen scraping

HTML browser virtualization, not APIs, may be the best way to mobilize existing enterprise applications like SAP ERP, Oracle E-Business Suite or Microsoft Dynamics.

At least, that's the perspective of Capriza, a company offering a SaaS-based mobility platform that uses a cloud-based secure virtualized browser to screen-scrape data and context from the enterprise application's Web interface. That data is then sent to a mobile device (like a phone or tablet) where it's rendered and presented through Capriza's app... [READ MORE](#)

### Three Steps to Evolve your Application Troubleshooting

How easy is it for your development team to troubleshoot an application issue?

The environment in which your application development occurs has been changing at a rapid pace. So rapid, in fact, that methods to troubleshoot custom applications have not kept up and are causing app troubleshooting to be a lengthy and painful process.
